

## Police Permits and Registry

### **What is Video Camera Registry?**

The Video Camera Registry Program is a website that allows residents and business owners to work in partnership with the Concord Police Department to help address crime issues by registering the locations of their video security systems. By providing this information to us, we will then be able to see where cameras are located within the City. If you register your camera, we may contact you if we are conducting a criminal investigation near your cameras. We will always ask permission to review the video from your security system and may ask if we can make a copy onto a storage device. Your camera may have captured information that can help us investigate these crimes. Recordings at the time of an incident may provide useful information related to the crime, such as a vehicle and person descriptions and directions of travel both before and after an event.
